CONTENTS OF VOLUME 61

NUMBER 1, 14 OCTOBER 1971

LITMAN, R. M., The Differential Effect of Magnesium and Manganese Ions on the Synthesis of Poly (dG·dC) and *Micrococcus luteus* DNA by *Micrococcus luteus* DNA Polymerase . . . . . 1

RUPP, W. D., WILDE, C. E., III., RENO, D. L. and HOWARD-FLANDERS, P., Exchanges Between DNA Strands in Ultraviolet-irradiated *Escherichia coli* 25

KREISHMAN, G. P., CHAN, S. I. and BAUER, W., Proton Magnetic Resonance Study of the Interaction of Ethidium Bromide with Several Uracil Residues, Uridylyl (3′→5′) Uridine and Polyuridylic Acid . . . 45

DE JIMÉNEZ, E. S., DOMÍNGUEZ, J. L., WEBB, F. H. and BOCK, R. M., Comparative DNA–RNA Hybridization in Differentiated Cells . . 59

LANE, C. D., MARBAIX, G. and GURDON, J. B., Rabbit Haemoglobin Synthesis in Frog Cells: the Translation of Reticulocyte 9 s RNA in Frog Oocytes 73

MOAR, V. A., GURDON, J. B., LANE, C. D. and MARBAIX, G., Translational Capacity of Living Frog Eggs and Oocytes, as Judged by Messenger RNA Injection . . . . . 93

FRIEDMAN, H., LU, P. and RICH, A., Temperature Control of Initiation of Protein Synthesis in *Escherichia coli* . . . . . 105

MARUTA, H., TSUCHIYA, T. and MIZUNO, D., *In vitro* Reassembly of Functionally Active 50 s Ribosomal Particles from Ribosomal Proteins and RNA's of *Escherichia coli* . . . . . 123

KREIDER, G. and BROWNSTEIN, B. L., A Mutation Suppressing Streptomycin Dependence. II. An Altered Protein on the 30 s Ribosomal Subunit . 135

KING, H. W. S., GOULD, H. J. and SHEARMAN, J. J., Molecular Weight Distribution of Proteins in Rabbit Reticulocyte Ribosomal Subunits . 143

GILMORE, R. A., STEWART, J. W. and SHERMAN, F., Amino Acid Replacements Resulting from Super-suppression of Nonsense Mutants of Iso-1-cytochrome *c* from Yeast . . . . . 157

KARLIN, A., PRIVES, J., DEAL, W. and WINNIK, M., Affinity Labeling of the Acetylcholine Receptor in the Electroplax . . . . . 175

Berliner, L. J., A 6 Å Crystallographic Study of a Spin-labeled Inhibitor Complex with Lysozyme . . . . . 189

Lotz, B. and Keith, H. D., The Crystal Structures of Poly(L-Ala-Gly-Gly-Gly)II and Poly(L-Ala-Gly-Gly)II . . . . . 195

Lotz, B. and Keith, H. D., Crystal Structure of Poly(L-Ala-Gly)II. A Model for Silk I . . . . . 201

Blake, C. C. F., Swan, I. D. A., Rerat, C., Berthou, J., Laurent, A. and Rerat, B., An X-ray Study of the Subunit Structure of Prealbumin . 217

Arnon, R. and Maron, E., An Immunological Approach to the Structural Relationship between Hen Egg-white Lysozyme and Bovine α-Lactalbumin 225

Arnheim, N., Sobel, J. and Canfield, R., Immunochemical Resemblance between Human Leukemia and Hen Egg-white Lysozyme and their Reduced Carboxymethyl Derivatives . . . . . 237

Letters to the Editor—

Maisel, J. C. and McConkey, E. H., Nucleolar Protein Metabolism in Actinomycin D Treated HeLa Cells . . . . . 251

Campbell, J. W., Hodgson, G. I., Watson, H. C. and Scopes, R. K., A Preliminary X-ray Crystallographic Investigation of Yeast Phosphoglycerate Mutase . . . . . 257

Tischendorf, F. W., Michelitsch, B., Ledderhose, G. and Tischendorf, M. M., Non-allelic Nature of the Basic Sequences of the Variable Region of Human Immunoglobulin Lambda Chains . . 261

Kearns, D. R., Patel, D., Shulman, R. G. and Yamane, T., High Resolution Nuclear Magnetic Resonance Study of Base Pairing in Four Purified Transfer RNA Molecules . . . . . 265

Hall, B. G. and Gallant, J. A., Effect of the RC Gene Product on Constitutive Enzyme Synthesis . . . . . 271

Schleif, R. F., L-Arabinose Operon Messenger of *Escherichia coli*. Its Inducibility and Translation Efficiency Relative to Lactose Operon Messenger . . . . . 275

Slobin, L. I., Sulfhydryl Groups of *Escherichia coli* Ribosomes and Ribosomal Proteins . . . . . 281

Number 2, 28 October 1971

Sundaralingam, M. and Carrabine, J. A., Stereochemistry of Nucleic Acids and their Constituents. XIX. Copper Binding Sites and Mechanism of G·C Selective Denaturation of DNA. Crystal and Molecular Structures of Guanine·Copper(II) Chloride and Cytosine·Copper(II) Chloride Complexes 287

Ihler, G. and Kawai, Y., Alternate Fates of the Complementary Strands of Lambda DNA after Infection of *Escherichia coli* . . . . . 311

Schwartz, M. and Worcel, A., Reinitiation of Chromosome Replication in a Thermosensitive DNA Mutant of *Escherichia coli*. II. Synchronization of Chromosome Replication after Temperature Shifts . . . . . 329

Drahovský, D. and Morris, N. R., Mechanism of Action of Rat Liver DNA Methylase. II. Interaction with Single-stranded Methyl-acceptor DNA . 343

Cascino, A., Geiduschek, E. P., Cafferata, R. L. and Haselkorn, R., T4 DNA Replication and Viral Gene Expression . . . . . 357

Hyman, R. W., Physical Mapping of T7 Messenger RNA . . . . . 369

Rudland, P. S. and Klemperer, H. G., A Factor Promoting the Ejection of Deacylated Initiator transfer RNA from Ribosomes . . . . . 377

Chang, F. N. and Flaks, J. G., Topography of the *Escherichia coli* Ribosome. II. Preliminary Sequence of 50 s Subunit Protein Attack by Trypsin and its Correlation with Functional Activities . . . . . 387

Melchers, F. and Messer, W., Hybrid Enzyme Molecules reconstituted from Mixtures of Wild-type and Mutant *Escherichia coli* $\beta$-galactosidase . . 401

McLachlan, A. D., Tests for Comparing Related Amino-acid Sequences. Cytochrome *c* and Cytochrome $c_{551}$ . . . . . 409

Hopfield, J. J., Shulman, R. G. and Ogawa, S., An Allosteric Model of Hemoglobin. I. Kinetics . . . . . 425

Hill, R. J., Poccia, D. L. and Doty, P., Towards a Total Macromolecular Analysis of Sea Urchin Embryo Chromatin . . . . . 445

Letter to the Editor—

Lee, B., Conformation of Penicillin as a Transition-state Analog of the Substrate of Peptidoglycan Transpeptidase . . . . . 463

Number 3, 14 November 1971

Strätling, W. and Knippers, R., Deoxyribonucleic Acid Synthesis in Isolated DNA–Membrane Complexes . . . . . 471

Salstrom, J. S. and Pratt, D., Role of Coliphage M13 Gene *5* in Single-stranded DNA Production . . . . . 489

Manor, H., Deutscher, M. P. and Littauer, U. Z., Rates of DNA Chain Growth in *Escherichia coli* . . . . . 503

*Appendix*—Analysis of the Deoxyribonucleotide Step-time in DNA Synthesis Drawing on a Precursor Pool of Variable Specific Activity . . . 522

Cohen, R. J. and Crothers, D. M., Rate of Unwinding Small DNA . . 525

Meinke, W. and Goldstein, D. A., Studies on the Structure and Formation of Polyoma DNA Replicative Intermediates . . . . . 543

Francke, B. and Ray, D. S., Formation of the Parental Replicative Form DNA of Bacteriophage $\phi$X174 and Initial Events in its Replication . . 565

VON HIPPEL, P. H. and WONG, K., Dynamic Aspects of Native DNA Structure: Kinetics of the Formaldehyde Reaction with Calf Thymus DNA . . . 587

DICKSON, E., BOYD, J. B. and LAIRD, C. D., Sequence Diversity of Polytene Chromosome DNA from *Drosophila hydei* . . . . . 615

DRLICA, K. A. and KNIGHT, C. A., Inhibition of Chloroplast DNA Synthesis by Cycloheximide . . . . . 629

BANERJEE, A. K. and SHATKIN, A. J., Guanosine-5′-diphosphate at the 5′ Termini of Reovirus RNA: Evidence for a Segmented Genome within the Virion . . . . . 643

PEDERSON, T. and KUMAR, A., Relationship between Protein Synthesis and Ribosome Assembly in HeLa Cells . . . . . 655

NOLLER, H. F., CHANG, C., THOMAS, G. and ALDRIDGE, J., Chemical Modification of the Transfer RNA and Polyuridylic Acid Binding Sites of *Escherichia coli* 30 s Ribosomal Subunits . . . . . 669

HOFNUNG, M., SCHWARTZ, M. and HATFIELD, D., Complementation Studies in the Maltose-A Region of the *Escherichia coli* K12 Genetic Map . . . 681

STEITZ, T. A., Structure of Yeast Hexokinase-B. I. Preliminary X-ray Studies and Subunit Structure . . . . . 695

ROSS, P. D., SCRUGGS, R. L., HOWARD, F. B. and MILES, H. T., Heat of Reaction of Polyribo-5-bromocytidylic Acid and Polyribo-5-methylcytidylic Acid with Polyriboinosinic Acid . . . . . 727

LETTERS TO THE EDITOR—

JAENISCH, R. and LEVINE, A. J., Infection of Primary African Green Monkey Cells with SV40 Monomeric and Dimeric DNA . . . 735

YUKI, A., Detection of Precursor 16 s Ribosomal RNA in the Polysome Fraction of *Escherichia coli* . . . . . 739

EVERHART, L. P., JR., Heterogeneity of Microtubule Proteins from *Tetrahymena* Cilia . . . . . 745

# Index to Volume 61

Acetylcholine receptor in electroplax, affinity labelling, 175
Actinomycin D-treated HeLa cells, nucleolar protein metabolism, 251
Affinity labelling of the acetylcholine receptor in the electroplax, 175
African green monkey cells, infection with SV40 monomeric and dimeric DNA, 735
Aldridge, J. (see also Noller, H. F.), 669
Allosteric model of haemoglobin, kinetics, 425
Amino acid replacements resulting from supersuppression of nonsense mutants of iso-1-cytochrome *c* from yeast, 157
— — sequences, tests for comparing relationships using cytochrome *c* and *c* 551, 409
L-Arabinose operon messenger of *Escherichia coli*, inducibility and translation efficiency relative to lactose operon messenger.
Arnheim, N. Sobel, J. & Canfield, R., Immunochemical resemblance between human leukemia and hen egg-white lysozyme and their reduced carboxymethyl derivatives, 237
Arnon, R. & Maron, E., An immunological approach to the structural relationship between hen egg-white lysozyme and bovine α-lactalbumin, 225

Bacteriophage λ DNA, alternative fates of the complementary strands after infection of *Escherichia coli*, 311
— $\phi$174, formation of the parental replicative form DNA, 565
— T4 DNA replication and viral gene expression, 357
— T7 messenger RNA, physical mapping, 369
Banerjee, A. K. & Shatkin, A. J., Guanosine-5-diphosphate at the 5′ termini of reovirus RNA: evidence for a segmented genome within the virion, 643
Base pairing in four purified RNA molecules, study by high-resolution neclear magnetic resonance, 265
Bauer, W. (see also Kreishman, G. P.), 45
Berliner, L. J., A 6 A crystallographic study of a spin-labelled inhibitor complex with lysozyme, 189
Berthou, J. (see also Blake, C. C. F.), 217
Blake, C. C. F., Swan, I. D. A., Rerat, C. Berthou, J., Laurent, A. & Rerat, B., An X-ray study of the subunit structure of prealbumin, 217
Bock, R. M. (see also de Jiménez, E. S.), 59
Bovine α-lactalbumen and hen egg-white lysozyme, an immunological approach to the structural relationship, 225
Boyd, J. B. (see also Dickerson, E.), 615
Brownstein, B. L. (see also Kreider, G.), 135

Caffebata, R. L. (see also Cascino, A.), 357
Calf thymus DNA, kinetics of its reaction with formaldehyde, 587
Campbell, J. W., Hodgson, G. I., Watson, H. C. & Scopes, R. K., A preliminary X-ray crystallographic investigation of yeast phosphoglycerate mutase, 257
Canfield, R. (see also Arnheim, N.), 237
Carboxymethyl derivatives, reduced; human leukemia and hen egg-white lysozyme, immunochemical resemblances, 237
Carrabine, J. A. (see also Sundaralingam, M.), 287
Cascino, A., Geiduschek, E. P., Cafferata, R. L. & Haselkorn, R., T4 DNA replication and viral gene expression, 357
Chan, S. I. (see also Kreishman, G. P.), 45
Chang, C. (see also Noller, H. F.), 669
Chang, F. N. & Flaks, J. G., Topography of the *Escherichia coli* ribosome. II. Preliminary sequence of 50s subunit protein attack by trypsin and its correlation with functional activities, 387

Chloroplast DNA synthesis inhibition by cycloheximide, 629
Chromatin of sea urchin embryo, macromolecular analysis, 445
Chromosome DNA, polytene from *Drosophila hydei*, sequence diversity, 615
— replication synchronization after temperature shifts in a thermosensitive DNA mutant of *Escherichia, coli*, 329
Cohen, R. J. & Crothers, D. M., Rate of unwinding small DNA, 525
Coliphage M13 gene *5* in single-stranded DNA production, 489
Complementation studies in the maltose A region of *Escherichia coli* K12 genetic map, 681
Copper binding sites and the mechanism of G·C selective denaturation of DNA, 287
Crothers, D. M. (see also Cohen, R. J.), 525
Crystal and molecular structures of guanine·copper(II) chloride and cytosine·copper(II) chloride complexes, 287
— structure of poly (L-Ala-Gly)II: a model for silk I, 201
— structures of poly (L-Ala-Gly-Gly-Gly)II and poly (L-Ala-Gly-Gly)II, 195
Crystallographic, preliminary X-ray investigation of yeast phosphoglycerate mutase, 257
Crystallographic study at 6 Å of spin-labelled inhibitor complex with lysozyme, 189
Cycloheximide inhibition of chloroplast DNA synthesis, 629
Cytochrome c and cytochrome $c_{551}$ used in tests for comparing related amino-acid sequences, 409
Cytosine·copper(II) chloride and guanine·copper(II) chloride complexes, crystal and molecular structures, 287

Deacylated initiator tRNA, a factor promoting its ejection from ribosomes, 377
Deal, W. (see also Karlin, A.), 175
Deoxyribonucleic acid polymerase of *Micrococcus luteus* and poly(dG·dC) synthesis, differential effect of magnesium and manganese ions, 1
— — of calf thymus, kinetics of its reaction with formaldehyde, 587
— — chain growth rate in *Escherichia coli*, 503
— — of chloroplast, synthesis inhibition by cycloheximide, 629
— — chromosome replication synchronization after temperature shifts in a thermo-sensitive DNA mutant of *Escherichia coli*, 329
— — effect on complementary strands of *Escherichia coli* infection, 311
— — methylase from rat liver, interaction with single-stranded methyl-acceptor DNA, 343
— — parental replicative, formation in $\phi$ X174 bacteriophage and initial events in its replication, 565
— — from polytene chromosome of *Drosophila hydei*, 615
— — –RNA hybridization, comparative, in differentiated cells, 59
— —, role of coliphage M13 gene 5 in single-stranded DNA production, 489
— —, SV40, monomeric and dimeric, infection of African green monkey cells, 735
— —, selective denaturation by G·C and copper binding sites, 287
— —, small, unwinding rate, 525
— — strands, exhanges in ultraviolet irradiated *Escherichia coli*, 25
— —, structure and formation of polyoma DNA replicative intermediates, 543
— — synthesis in isolated DNA–membrane complexes, 471
— — — from a pool of variable specific activity, 522
— — of T4, replication and viral gene expression, 357
— — – membrane complexes, DNA synthesis, 471
Deoxyribonucleotide step-time in DNA synthesis from a pool of variable specific activity, 522
Deutscher, M. P. (see also Manor, H.), 503
Dickerson, E., Boyd, J. B. & Laird, C. D., Sequence diversity of polytene chromosome DNA from *Drosophila hydei*, 615
Domínguez, J. L. (see also de Jiménez, E. S.), 59
Doty, P. (see also Hill, R. J.), 445
Drahovský, D. & Morris, N. R., Mechanism of action of rat liver DNA methylase. II. Interaction with single-stranded methyl-acceptor DNA, 343
Drlica, K. A. & Knight, C. A., Inhibition of chloroplast DNA synthesis by cycloheximide, 629
*Drosophila hydei*, sequence diversity of polytene chromosome DNA, 615

Eggs and oocytes of frog, translational capacity as judged by mRNA injection, 93
Electroplax acetylcholine receptor, affinity labelling, 175
Embryo of sea urchin, macromolecular analysis of chromatin, 445
Enzyme synthesis, constitutive, affected by relaxed constitutive gene product, 271

*Escherichia coli* L-arabinose operon messenger, inducibilty and translation efficiency relative to lactose operon messenger, 275
— —, chromosome replication synchronization after temperature shifts in a thermosensitive DNA mutant, 329
— — DNA chain growth rate, 503
— —, detection of precursor 16 s ribosomal RNA, 739
— — β-galactosidase, wild-type and mutant, yield hybrid enzyme molecules on reconstitution, 401
— — K12 genetic map, complementation studies in the maltose-A region,
— —, hybrid enzyme molecules reconstituted from mixtures of wild-type and mutant B-galactosidase, 401
— — infection, effect on complementary strands of λ DNA, 311
— — RNA's and ribosomal proteins, *in vitro* reassembly of functionally active 50 s ribosomal particles, 123
— — 30 s ribosomal subunit tRNA and poly-U binding sites modified chemically, 669
— — ribosome, preliminary sequence of 50 s subunit protein attacked by trypsin and its correlation with functional activities, 387
— — ribosomes and ribosomal proteins, sulphydryl groups, 281
— —, temperature control of initiation of protein synthesis, 105
— —, ultraviolet irradiated, exchanges between DNA strands, 25
Ethidium bromide interaction with several uracil residues, uridylyl (3′-5′) uridine and polyuridylic acid, proton magnetic resonance study, 45
Everhart, L. P., Heterogeneity of microtubule proteins from *Tetrahymena cilia*, 745

Flaks, J. G. (see also Chang, F. N.), 387
Formaldehyde reaction with calf thymus DNA, kinetics, 587
Francke B. & Ray, D. S., Formation of the parental replicative form DNA of bacteriophage φX174 and initial events in its replication, 565
Friedman, H., Lu, P., Rich, A., Temperature control of initiation of protein synthesis in *Escherichia coli*, 105
Frog eggs and oocytes, translational capacity as judged by mRNA injection, 93
— oocytes, translation of reticulocyte 9 s RNA during rabbit haemoglobin synthesis in the frog cells, 73
β-Galactosidase, mixtures of wild-type and mutant *Escherichia coli* β enzymes yield hybrid enzyme molecules on reconstitution, 401

Gallant, J. A. (see also Hall, B. G.), 271
Geiduschek, E. P. (see also Cascino, A.), 357
Gene product, relaxed constitutive, effect on constitutive enzyme synthesis, 271
